Publications in Refereed Journals

Fausch, K. D., and R. J. White. 1981. Competition between brook trout (Salvelinus fontinalis) and brown trout (Salmo trutta) for positions in a Michigan stream. Canadian Journal of Fisheries and Aquatic Sciences 38:1220-1227.

Fausch, K. D. 1989. Do gradient and temperature affect distributions of, and interactions between, brook charr (Salvelinus fontinalis) and other resident salmonids in streams? Physiology and Ecology Japan, Special Vol. 1:303-322.

distribution for conservation of rare great plains fishes: Hybognathus (Teleostei:

minnow persistence in a Great Plains river. Transactions of the American Fisheries

streams: differences in biology and evidence for competition. Canadian Journal of
Fisheries and Aquatic Sciences 60:1018-1036.

restructures stream and forest food webs by interrupting reciprocal prey subsidies.
Ecology 85:2656-2663. Baxter won the 2005 Hynes Award for Young Investigators from
the North American Benthological Society for this paper

evolutionary consequences of biotic homogenization: beyond a simple focus on species

effects of brook trout on native cutthroat trout. Ecological Applications 14:754-772.

chinook salmon in the upper Sacramento River margin before and after hatchery releases.

invertebrate prey link streams and riparian zones. Freshwater Biology 50:201-220.

global warming scenarios in greenback cutthroat trout (Oncorhynchus clarki stomias)
streams: implications for species recovery. Western North American Naturalist 65:371-
381.

channelization, and web-weaving spiders in northern Japan. Ecological Research 20:646-
651.

Chinook salmon in enclosures in the Sacramento River, California. Transactions of the

Book
